Hong Kong University Public Opinion Programme

Search .

The Public Opinion Programme (POP) at Hong Kong University was established in June 1991 to collect and study public opinion on topics which could be of interest to academics, journalists, policy-makers, and the general public. Since its establishment, POP has been providing quality survey services to a wide range of public and private organizations. Up to this date, POP has conducted more than 1,500 independent surveys and other kinds of research, almost all of which are funded by outside sources. POP's project partners include government departments, public organizations, non-government organizations, professional bodies, political groups, leading commercial firms, small and medium enterprises, local and overseas media organizations, overseas universities, as well as international associations. Surveys have been conducted on a broad range of topics. In addition to commissioned projects, POP has self-funded a pool of almost 200 tracking questions which are repeated periodically. These questions relate to a spectrum of social issues in Hong Kong and have been asked for over 24 years.

HKU Public Opinion Programme is now a Roper Center data provider.

Hong Kong University's Public Opinion Programme has been conducting quality research on all aspects of life in Hong Kong for over a quarter-century. The Roper Center is proud to announce that this important body of work will be made available to our research community.

The first datasets have been added to the collection and are listed below. These will be followed soon by additional polls from the election tracking series and the ethnic identity project. Historical and recent polls from other HKUPOP projects will be added over the coming year.

2016 Legislative Council Election Pre-nomination Survey [HKPOP2016-LCPREN07]

This poll of 5,084 Cantonese-speaking registered voters in Hong Kong was conducted June 20-July 8, 2016 by Public Opinion Programme, The University of Hong Kong, for Power of Democracy.

Survey on People's Ethnic Identity: June 2016 [HKPOP2016-PEI06]This poll of 1007 Cantonese-speaking adults in Hong Kong by Public Opinion

Programme, The University of Hong Kong, was conducted June 10-16, 2016.

Dataset Abstract

Title: 2016 Legislative Council Election Pre-nomination Survey [HKPOP2016-LCPREN07]

Survey Sponsor: Power of Democracy

Survey Firm: Public Opinion Programme, The University of Hong Kong

Study Date: June 20-July 8, 2016

Sample: Cantonese-speaking registered voters in Hong Kong

Sample Size: 5084 Variables: 30

Abstract: Voter status (1); district (1); Legislative Council candidate support (5); District Council

voter status (1); District Council candidate support (1); willingness to support candidates

with higher prospect of success (1).

Weight: Columns 1623-1630 (x.xxxxxxxx), Varname: WEIGHT

The study dataset(s) contain weight factors that should be employed in any data analysis. Typically weights are used in an attempt to assure that the survey sample more accurately

represents the population.

Welcome to the website of the World Association for Public Opinion Research!

Welcome to WAPOR!

WAPOR is an international professional association whose members recognize the centrality of public opinion in shaping and serving society. We emphasize not only the importance of conducting scientifically sound public-opinion research, but also how this information can be useful to society and its various publics.

As our constitution notes, WAPOR's mission means it strives to:

- "a) promote in each country of the world the right to conduct and publish scientific research on what the people and its groups think and how this thinking is influenced by various factors;
- b) promote the knowledge and application of scientific methods in this objective;
- c) assist and promote the development and publication of public opinion research worldwide; and
- d) promote international cooperation and exchange among academic and commercial researchers, journalists and political actors, as well as between the representatives of the different scientific disciplines."

總結:觀察與期望...

- 政治版塊變化不大
- 溫和派別空間縮窄
- 社會中間力量萎縮
- 特首選舉如箭在弦
- 公民社會重新起動
- 專業操守急不容緩
